

International Congress on Aerobiology 2018

From 3rd to 7th of September 2018, Parma (Italy) hosted the 11th International Congress on Aerobiology. This congress was very well organized by Roberto Albertini and his team in the congress centre of the chamber of commerce of this nice town.

A very interesting program offered the opportunity to attend sessions on different topics like aerobiology, palynology, modelling and forecasting, climate change, environment, health, air quality, indoor aerobiology and progresses in the automation of pollen monitoring and DNA measurements. 153 oral communications and 63 posters were presented.

During this congress, the first international ragweed workshop was organized by the International Ragweed Society.

A special session was dedicated to International/National/Regional survey networks and pointed out the importance to be networked.

EAS organized during the congress its committee meeting and general assembly.

Six young aerobiologists have been granted by EAS for this congress.

The next International Congress on Aerobiology will be in Worcester in 2022.
