

Palynology, Aerobiology and Allergy Science (PAAS) symposium

26-28 October, Vienna

Letty de Weger

From 26th -28th of October the Palynology, Aerobiology and Allergy Science (PAAS) Symposium was held in Vienna. The initiator of this symposium was Carmi Geller-Bernstein and it was organised by Uwe Berger and his team. The scientific committee (Carmi Geller-Bernstein, Uwe Berger, Katharina Bastl, Barbora Werchan, Maximilian Kmenta, Karl-Christian Bergmann, Nancy Agmon-Levin) succeeded in organising an highly interesting programme with presentations of different scopes. There were sessions dedicated to fossil sciences, pollen monitoring, allergology, and pollen and symptoms. In a parallel session a workshop was organised to a Ragweed Pollen Alarm System by Donat Magyar.

The symposium was preceded by an information meeting on 25th of October where Uwe Berger presented the new legal structure of the European Aerobiological Database.

This all in the beautiful city of Vienna, which was a perfect environment for presenting and exchanging scientific results and ideas.
